ADAM PARSEC'S

ALIEN RAIN

ISSUE TWO

2

One year ago...

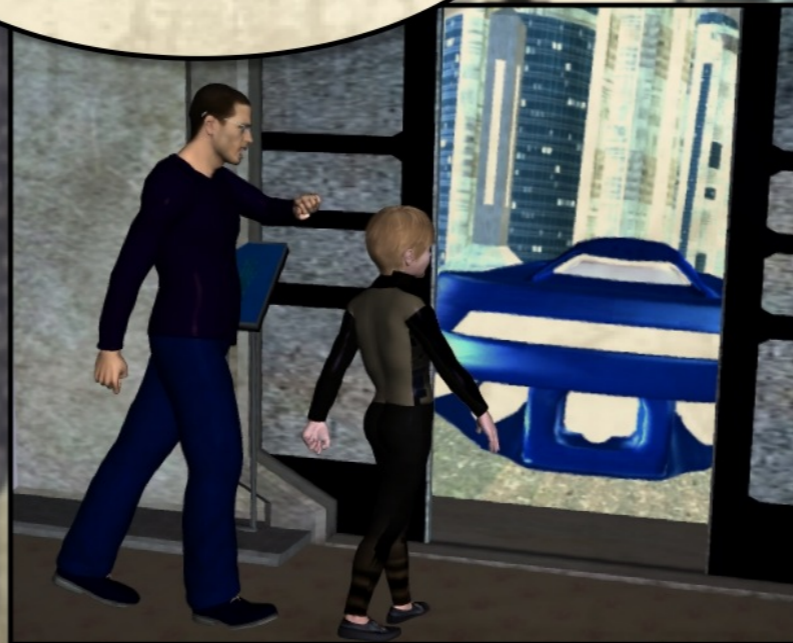

Earth 3009

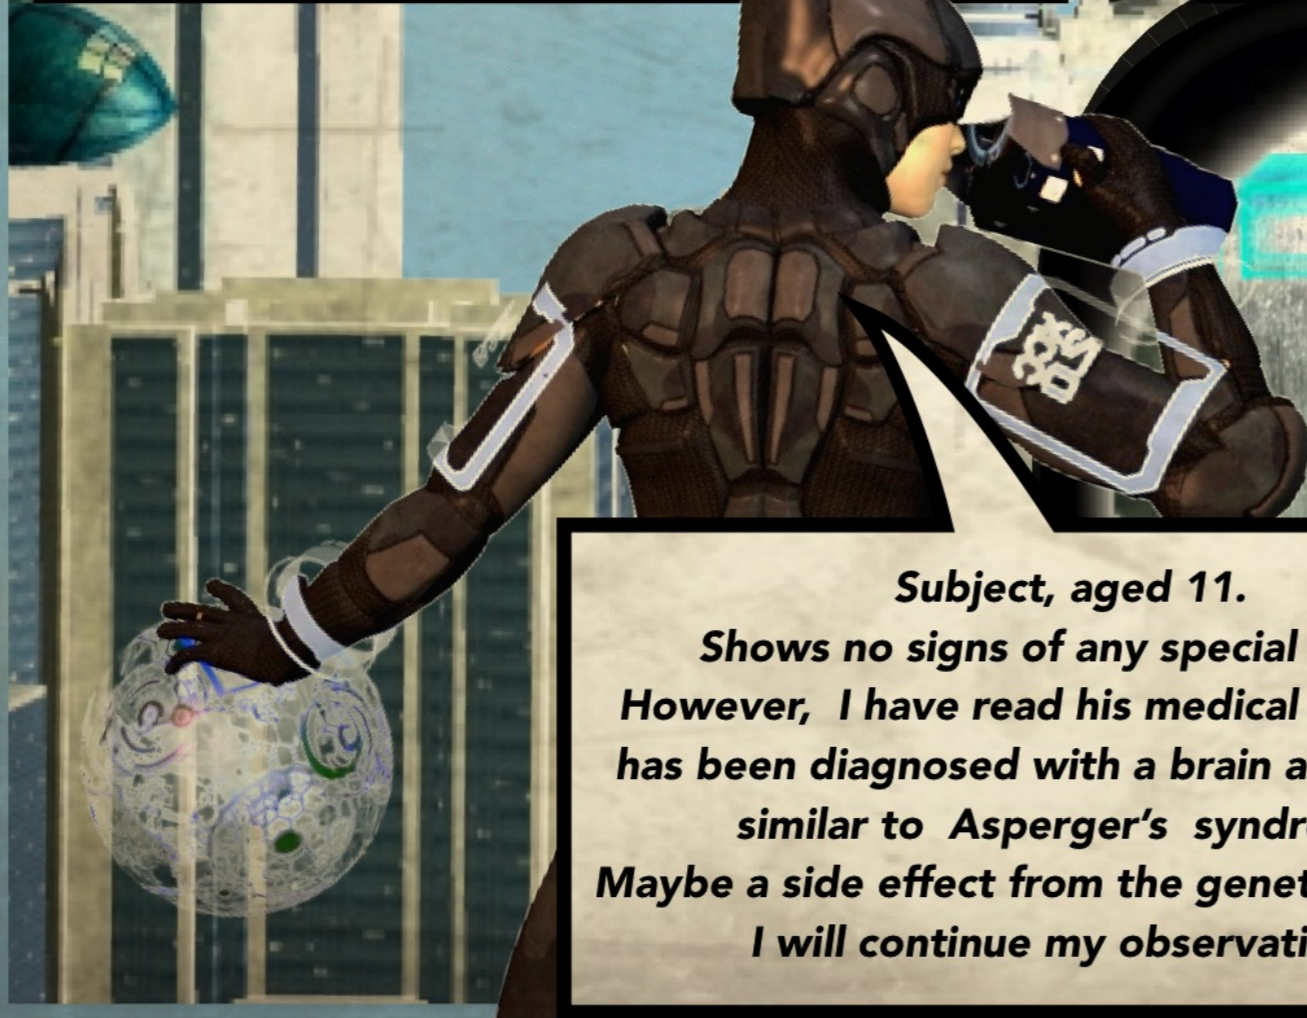

Why don't you take a seat while you wait?

Raine will wait at the door.

OK then, I will just get my security card and then we will be off.

Wow!
I think we're going to be on time for once.

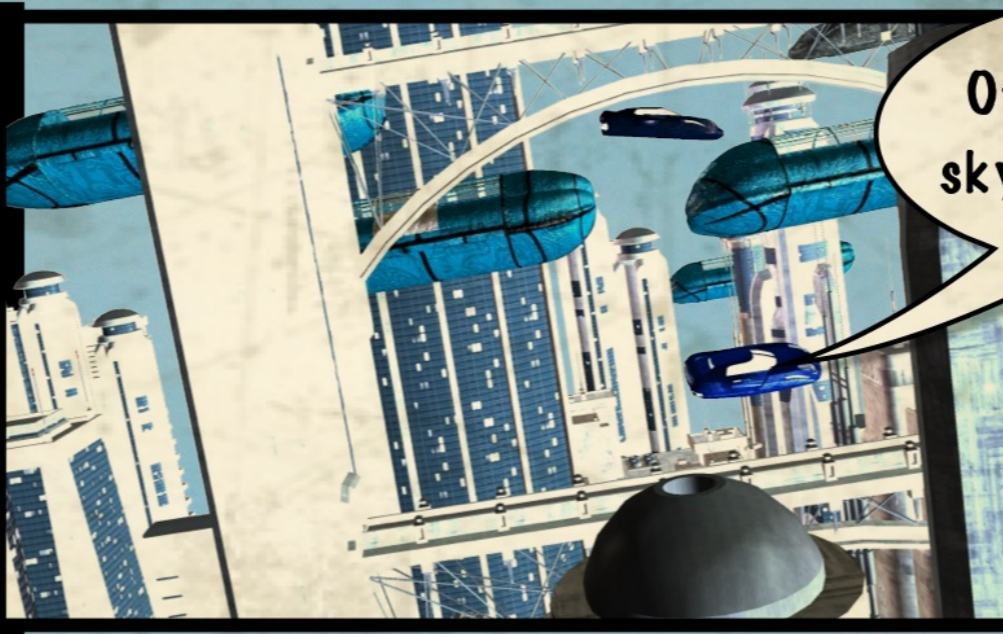

Subject, aged 11.
Shows no signs of any special ability.
However, I have read his medical file and he has been diagnosed with a brain abnormality similar to Asperger's syndrome.
Maybe a side effect from the genetic insertion.
I will continue my observations.

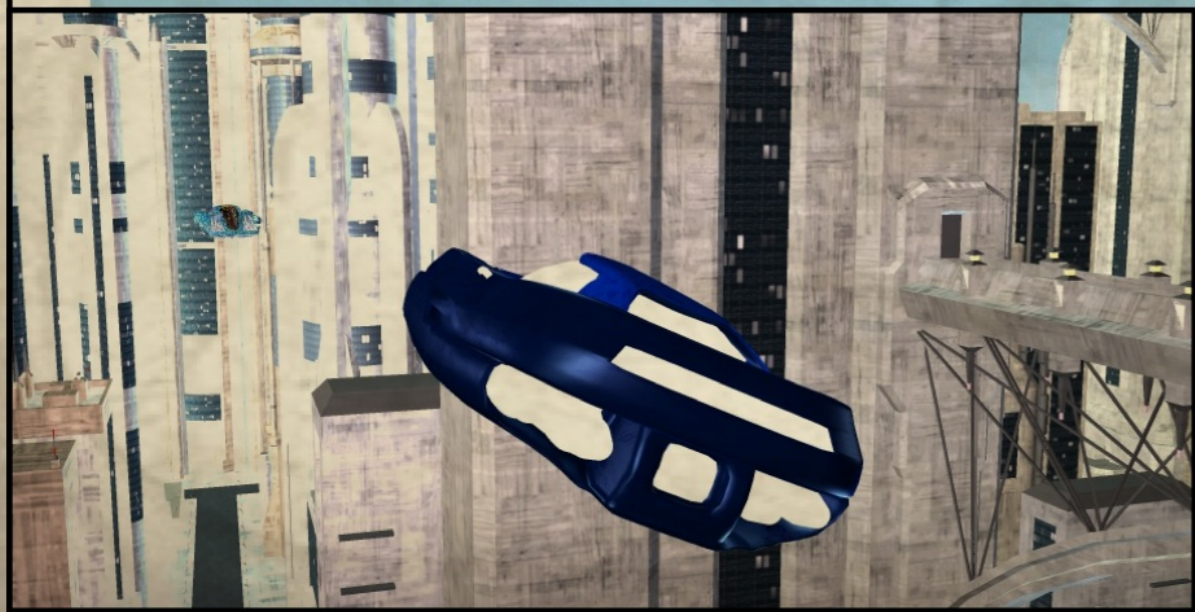

Turn left on west street...

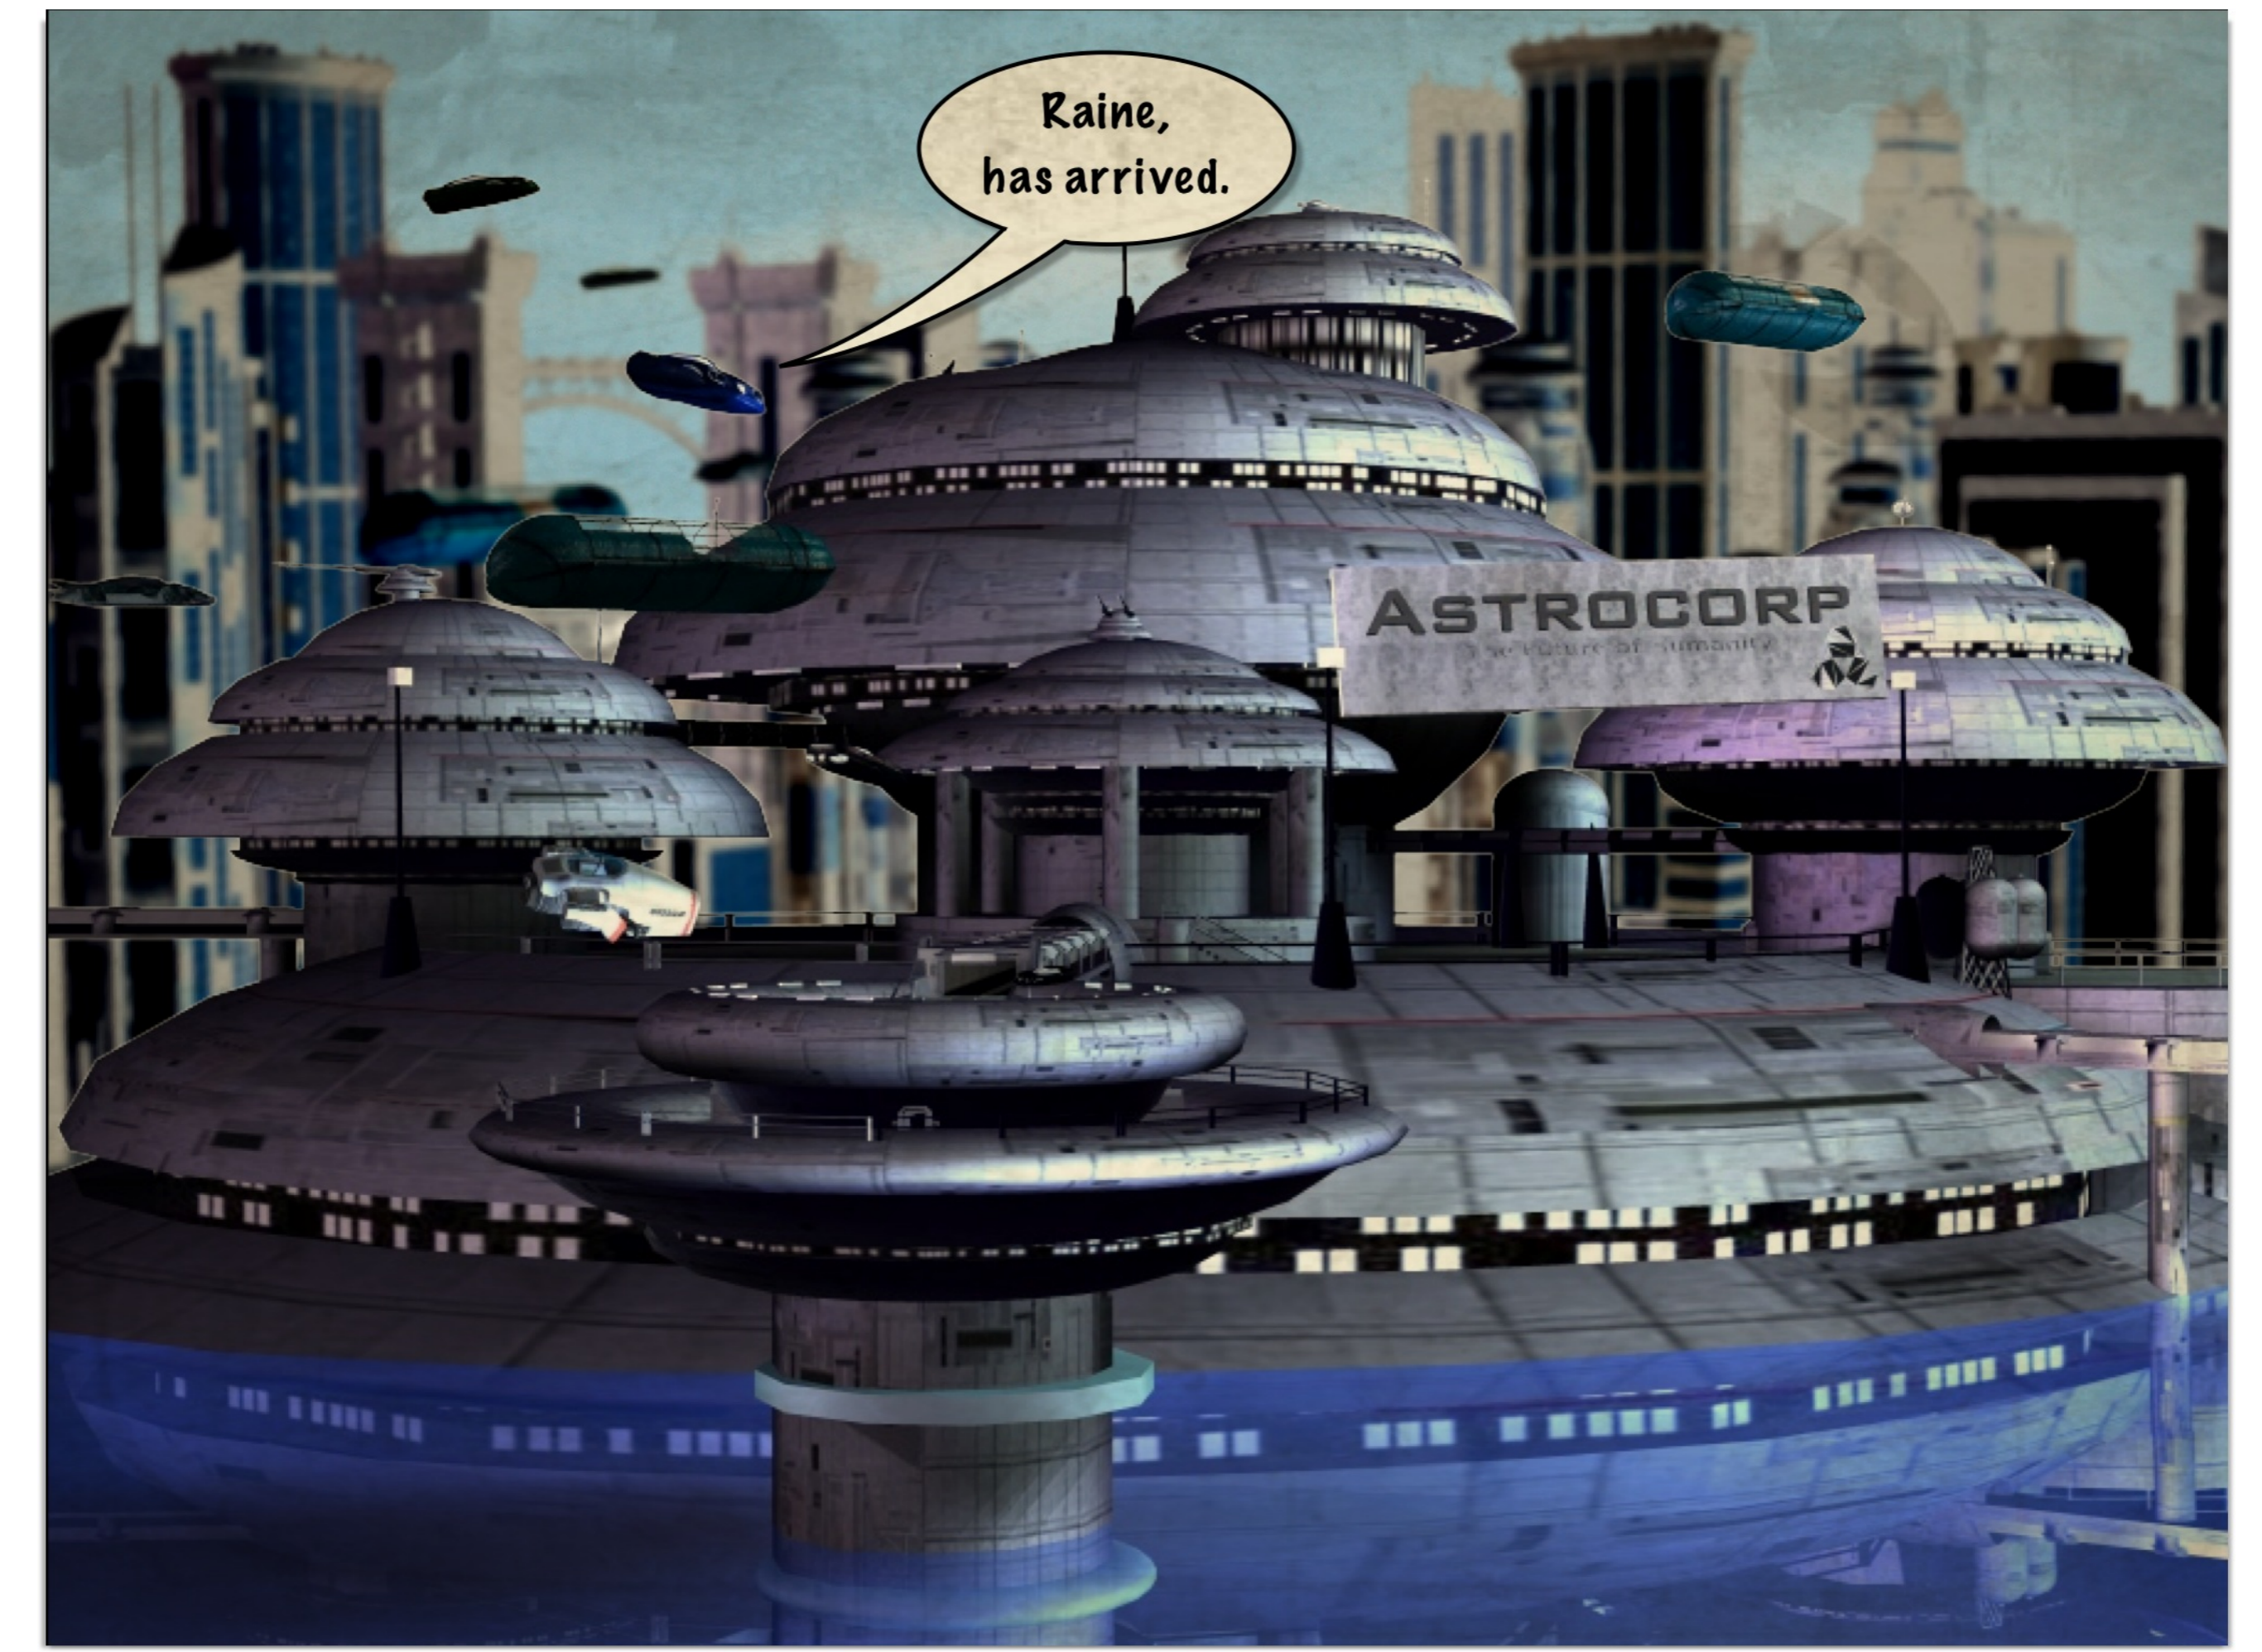

Off ramp to the sky lane express...

Continue to Astrocorp industries' exit...

Raine,
has arrived.

ASTROCORP
the future of humanity

Halt!
State your
business.

Adrian Day
reporting for work, and this is
my son Raine, he will be spending
the day with me.

Your
clearance has
been authorised.
You may enter.

Have a
nice day

Raine, welcome to Astrocorp. Your dad tells me you like science. Would you like to see the samples that we collected from other planets?

Yes. Raine would like that.

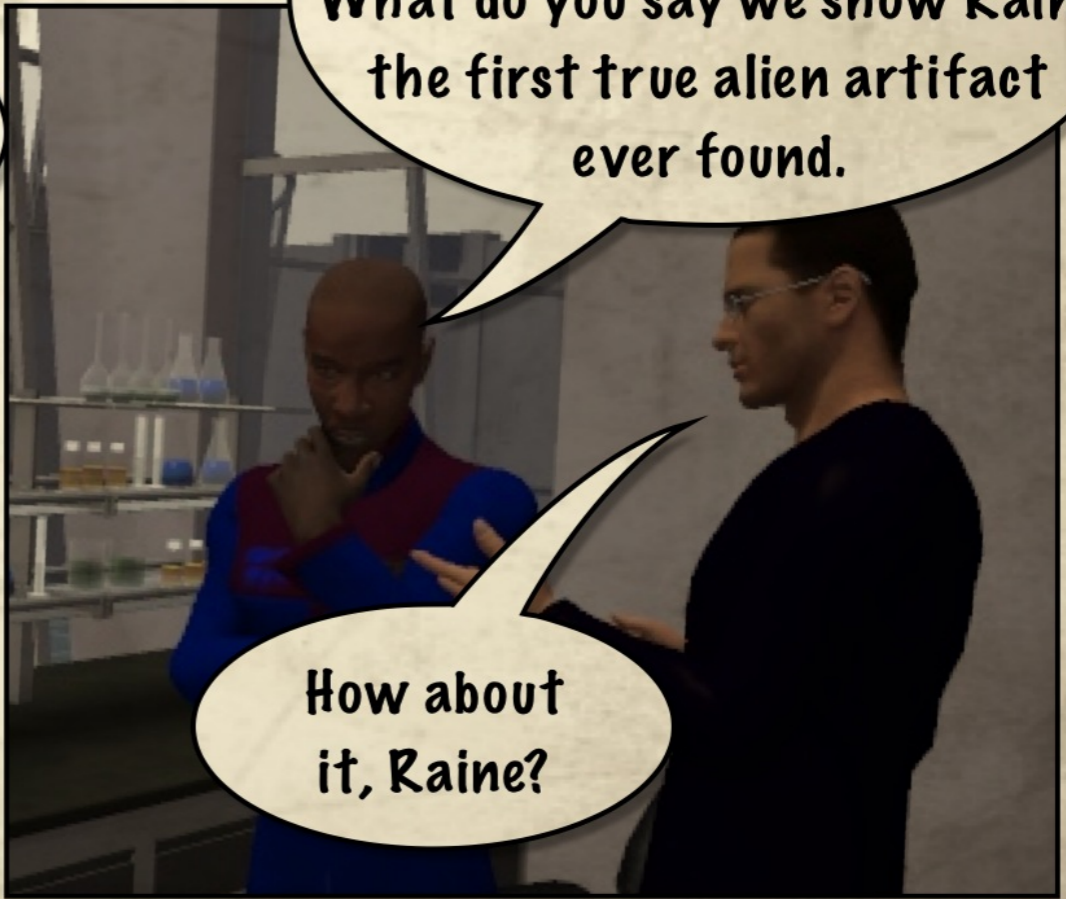

This was from our first expedition to mars. Before we terraformed the planet.

That was the day we found the artefact.

Do you still have it?

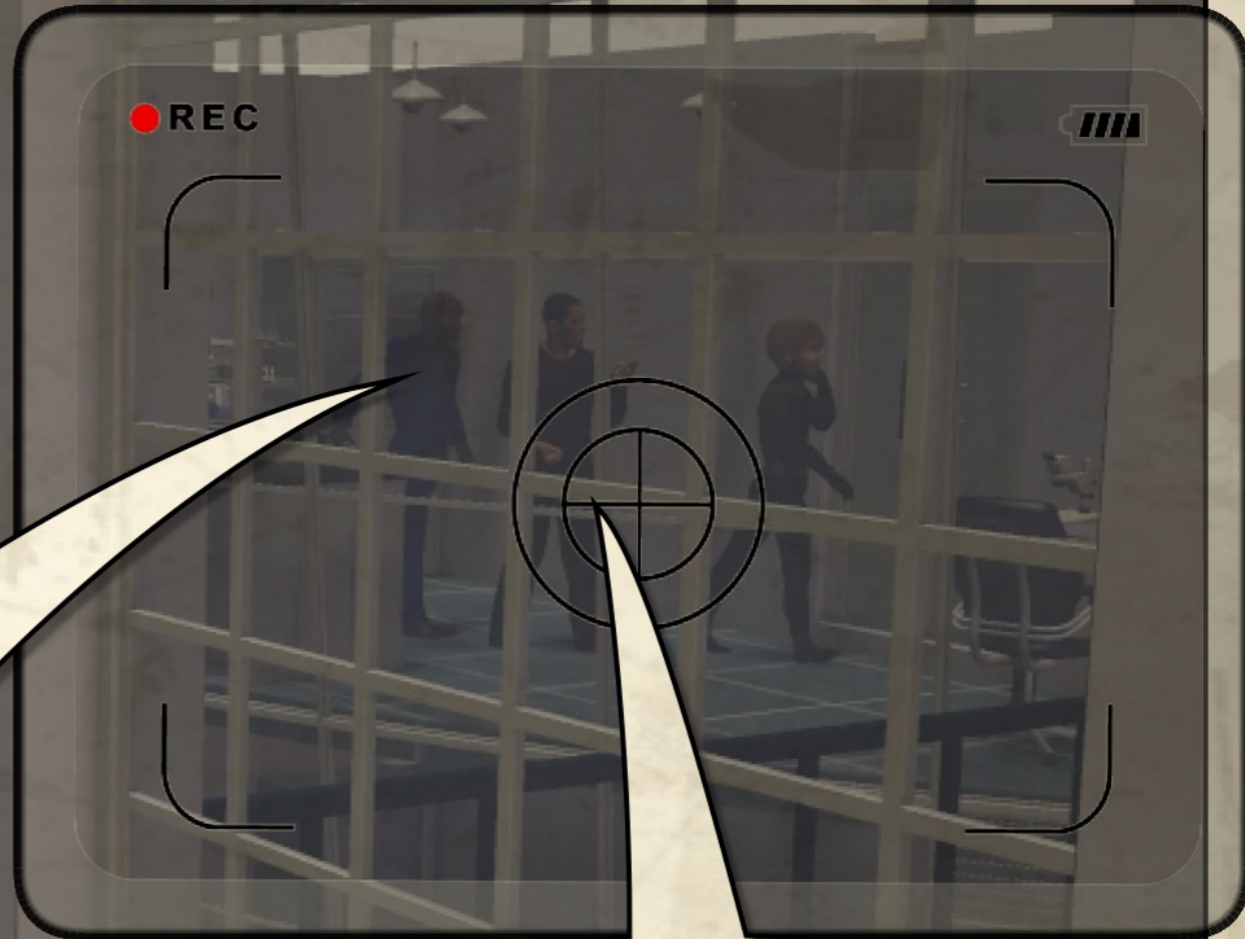

Yeh, its down in the storage room. What do you say we show Raine the first true alien artifact ever found.

How about it, Raine?

Wow, looks like someone is a bit anxious

Raine this is the artefact we dug out of the ground way back before you were born. It made the news. It was meant to be the proof of alien life that we were expecting to find. But still many years have past and the only other form of life we have found are plants and bacteria. No intelligent life any where.

Some would argue that we haven't found intelligent life here either.

Ha!

Ha!

Will Raine discover anything new?

Maybe one day. You might even become a famous explorer. You never know.

Are there still new worlds for Raine to discover?

There is a universe full of unknown worlds. We just need to find a way to travel that kind of distance in a reasonable amount of time. At the moment it would take many life times to reach even the closes ones.

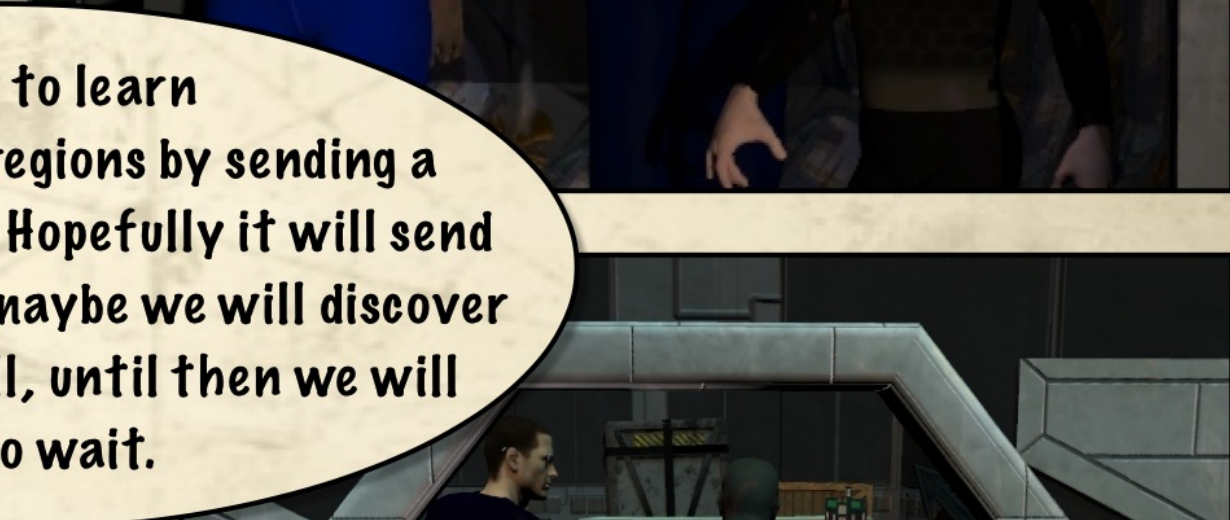

DOOR CLOSING
PLEASE STAND CLEAR

In a year from now,
we will have a spataculur view of a
new comet. One that hasn't been through
our solar system before. It comes from the
darkest regions of the universe and it has been
traveling toward us for millions of years.
Imagine what secrets it will hold.

Wow!

Door Opening
Sub level 4

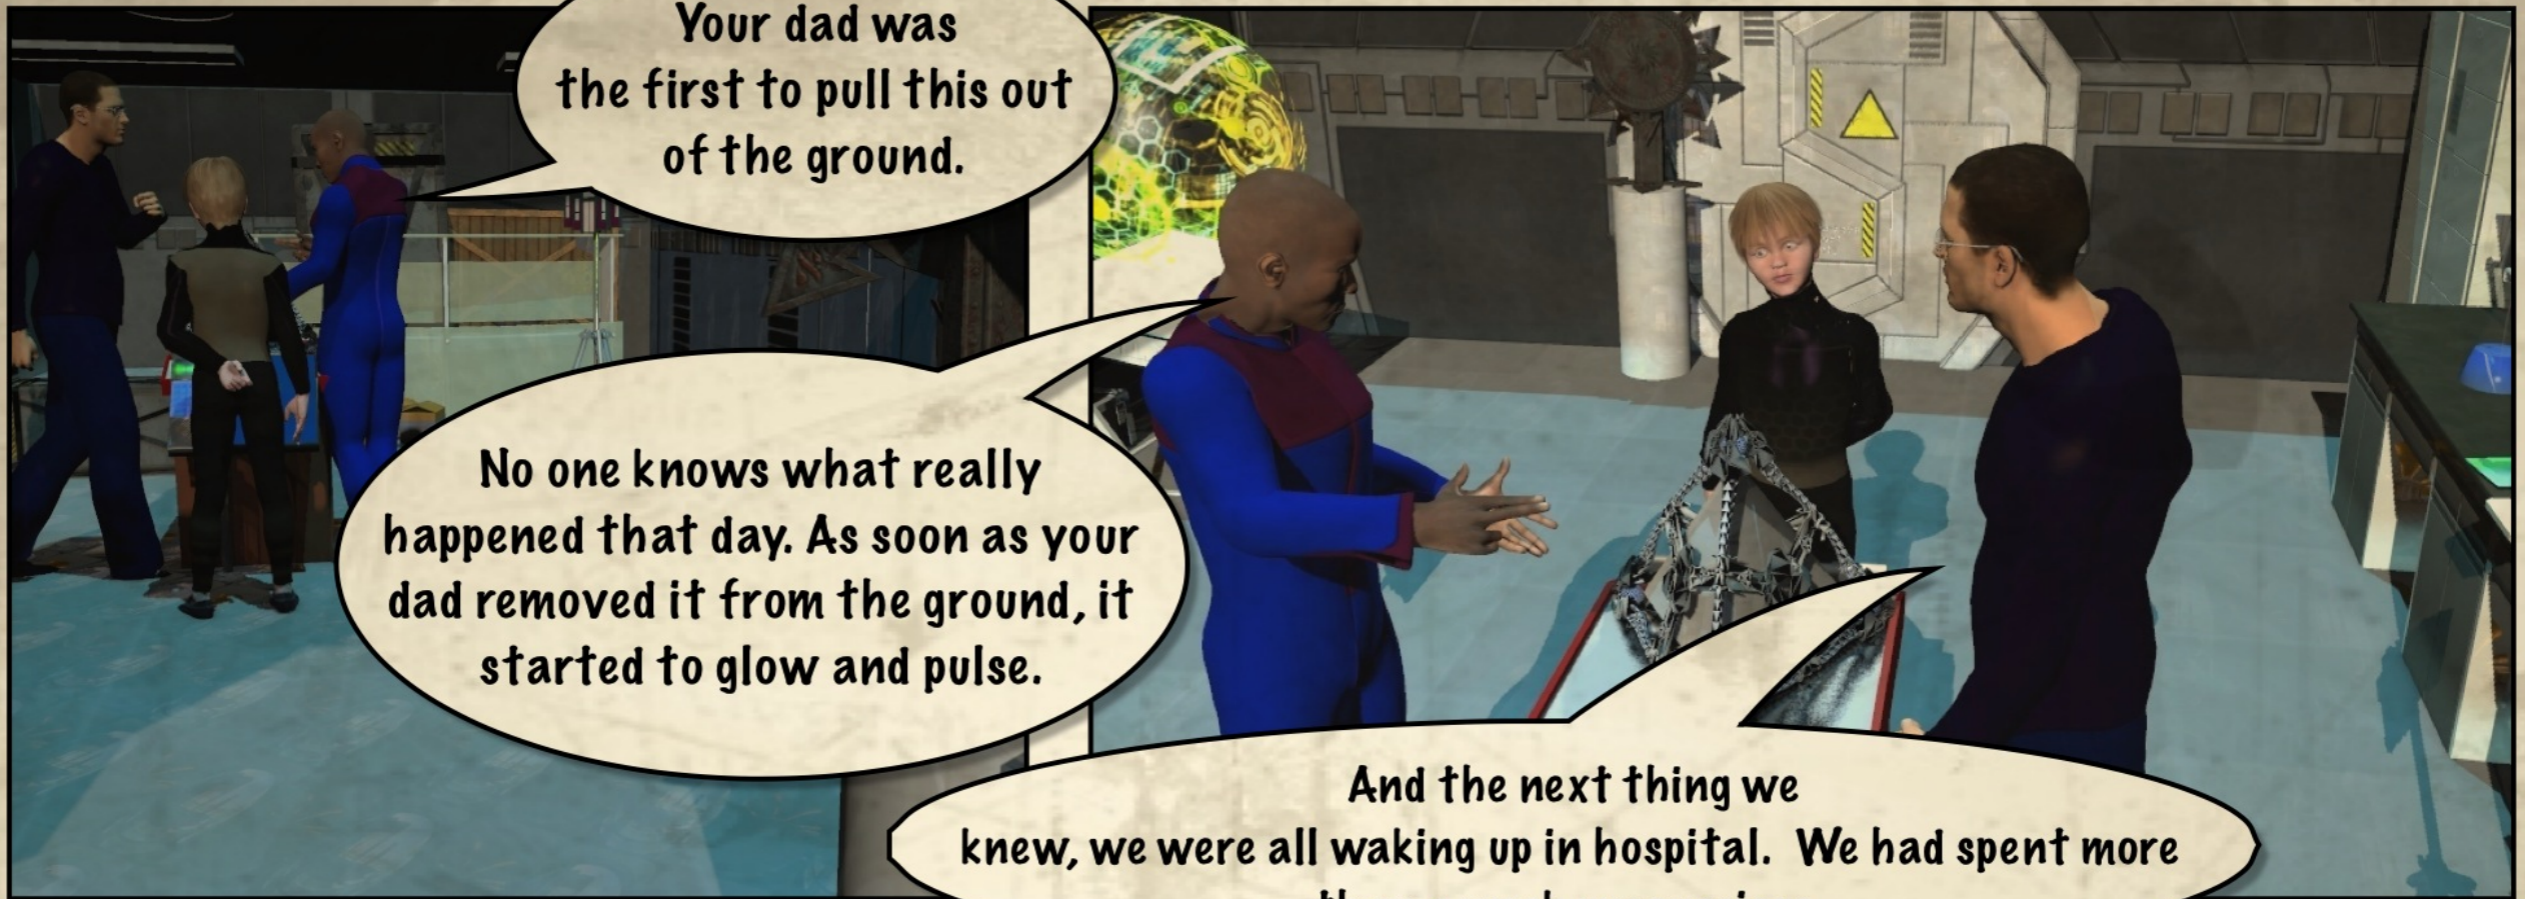

We hope to learn
more about these regions by sending a
probe into the comet. Hopefully it will send
back useful data and maybe we will discover
something new. Well, until then we will
have to wait.

Raine, you
have to be very careful
down here. These artifacts
are irreplaceable .

Your dad was the first to pull this out of the ground.

No one knows what really happened that day. As soon as your dad removed it from the ground, it started to glow and pulse.

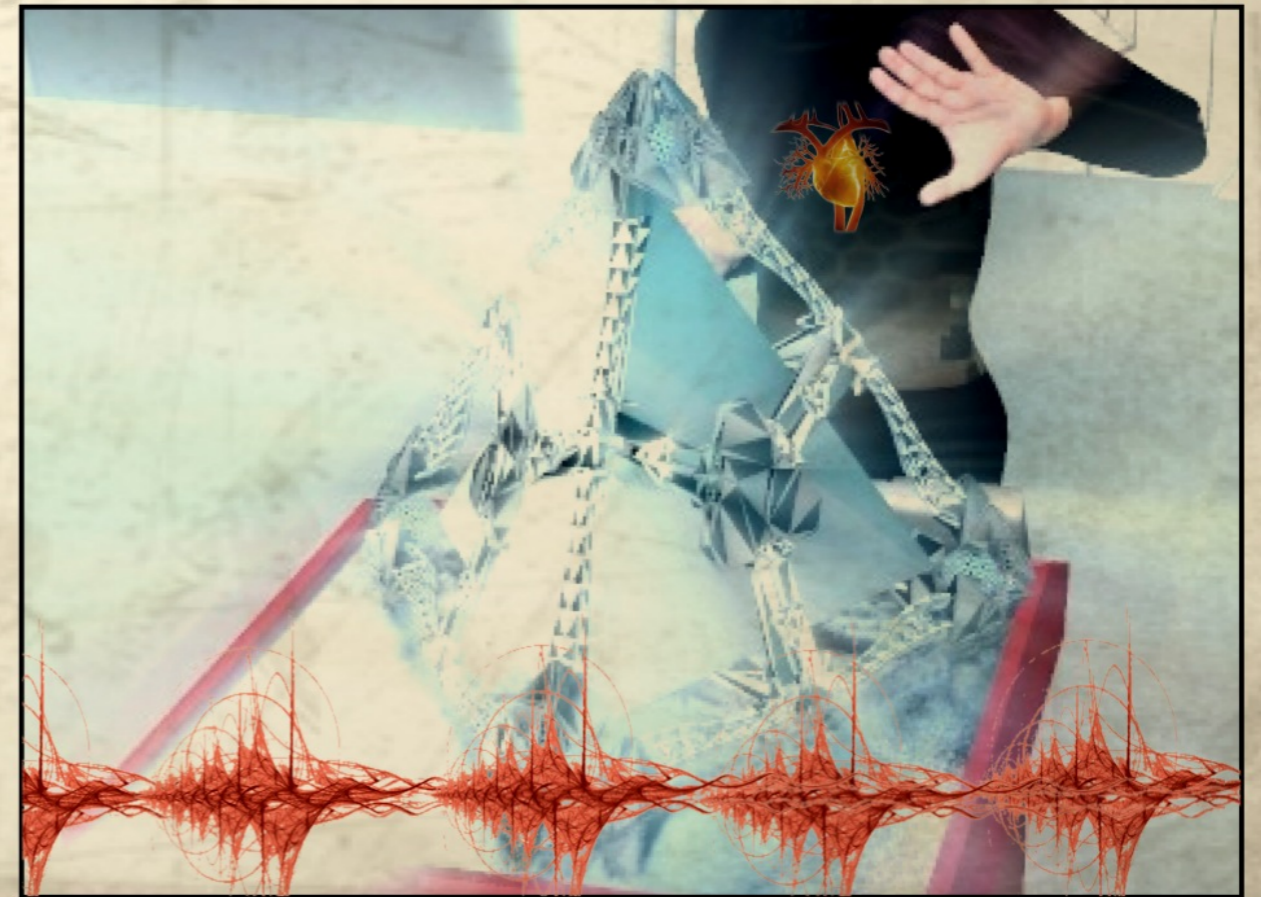

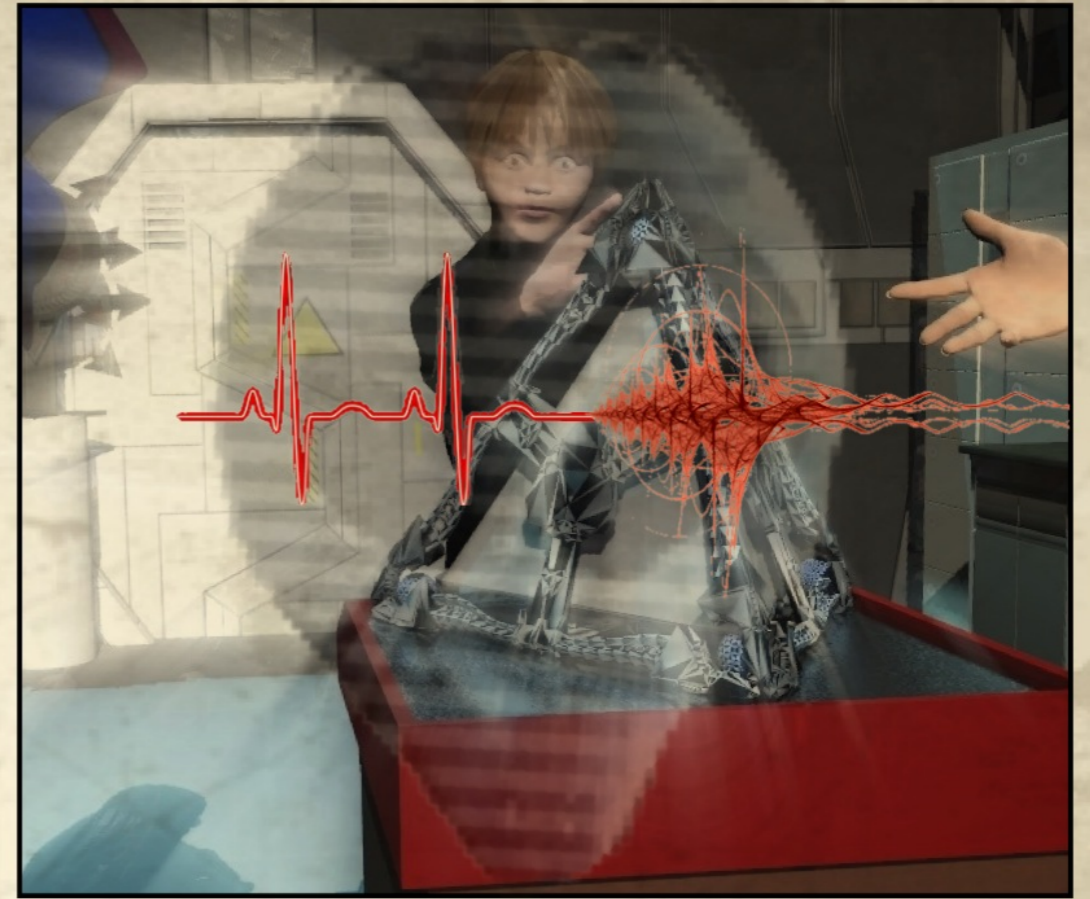

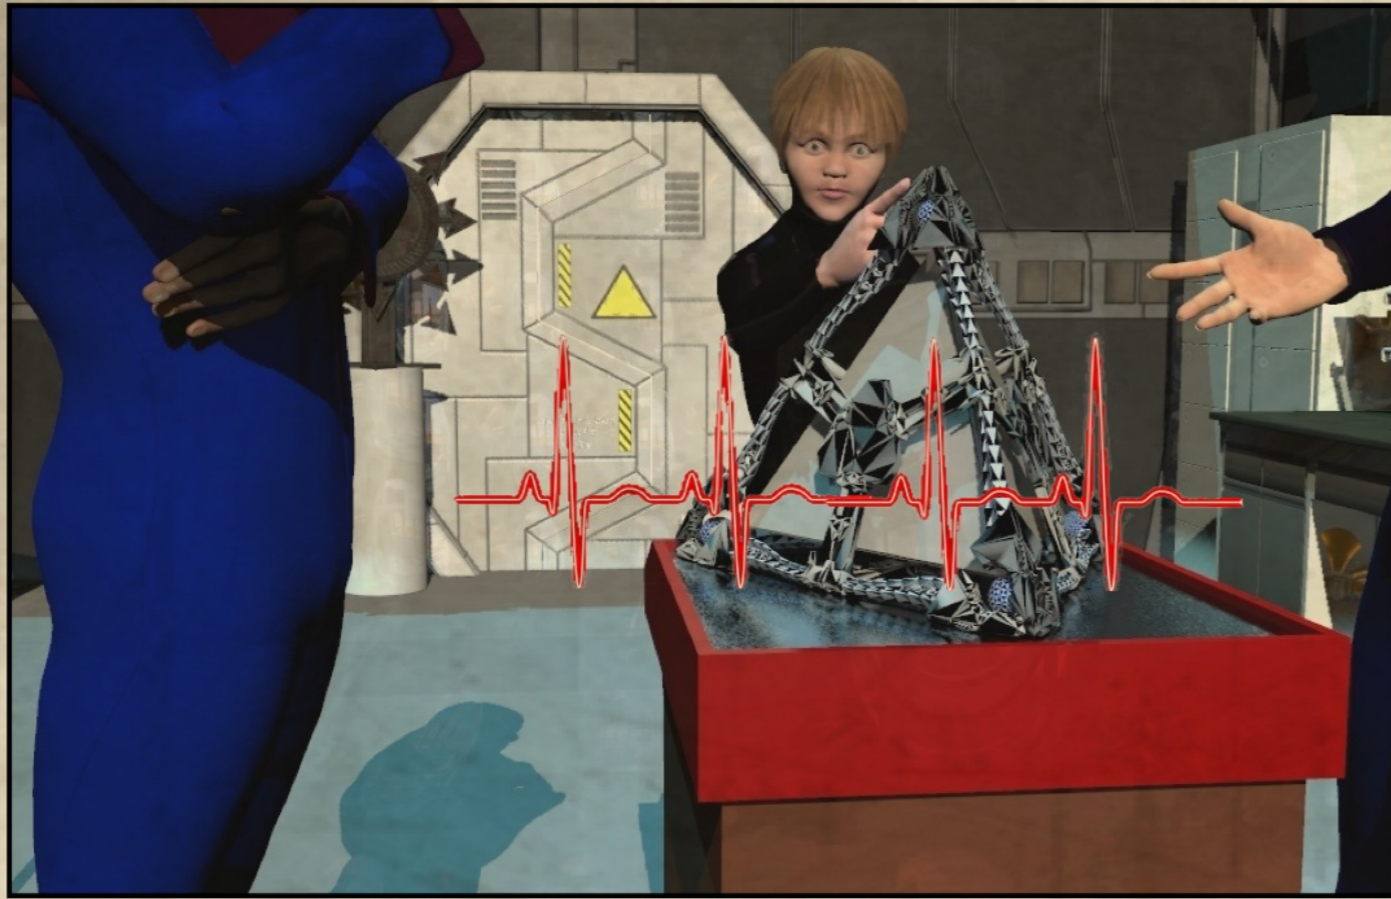

And the next thing we knew, we were all waking up in hospital. We had spent more than a week unconscious.

The whole area was quarantined until they knew what we were dealing with. They found nothing. After years of testing and experimenting on the artifact, not to mention the millions of dollars wasted on it. They accepted defeat. This thing is useless.

It's been down here, ever-since.

Wow! it hasn't done that in sixteen years.

What good would that do. They already have wasted enough time studying this thing, and do you remember what they discovered. Absolutely nothing. It would be a waste of time and a waste of good research money that could go to better things.

We should report the artifacts activity again. Let the researchers know that it glowed again.

Yeh, I suppose. We could use the money to discover a new artifact that may actually do something.

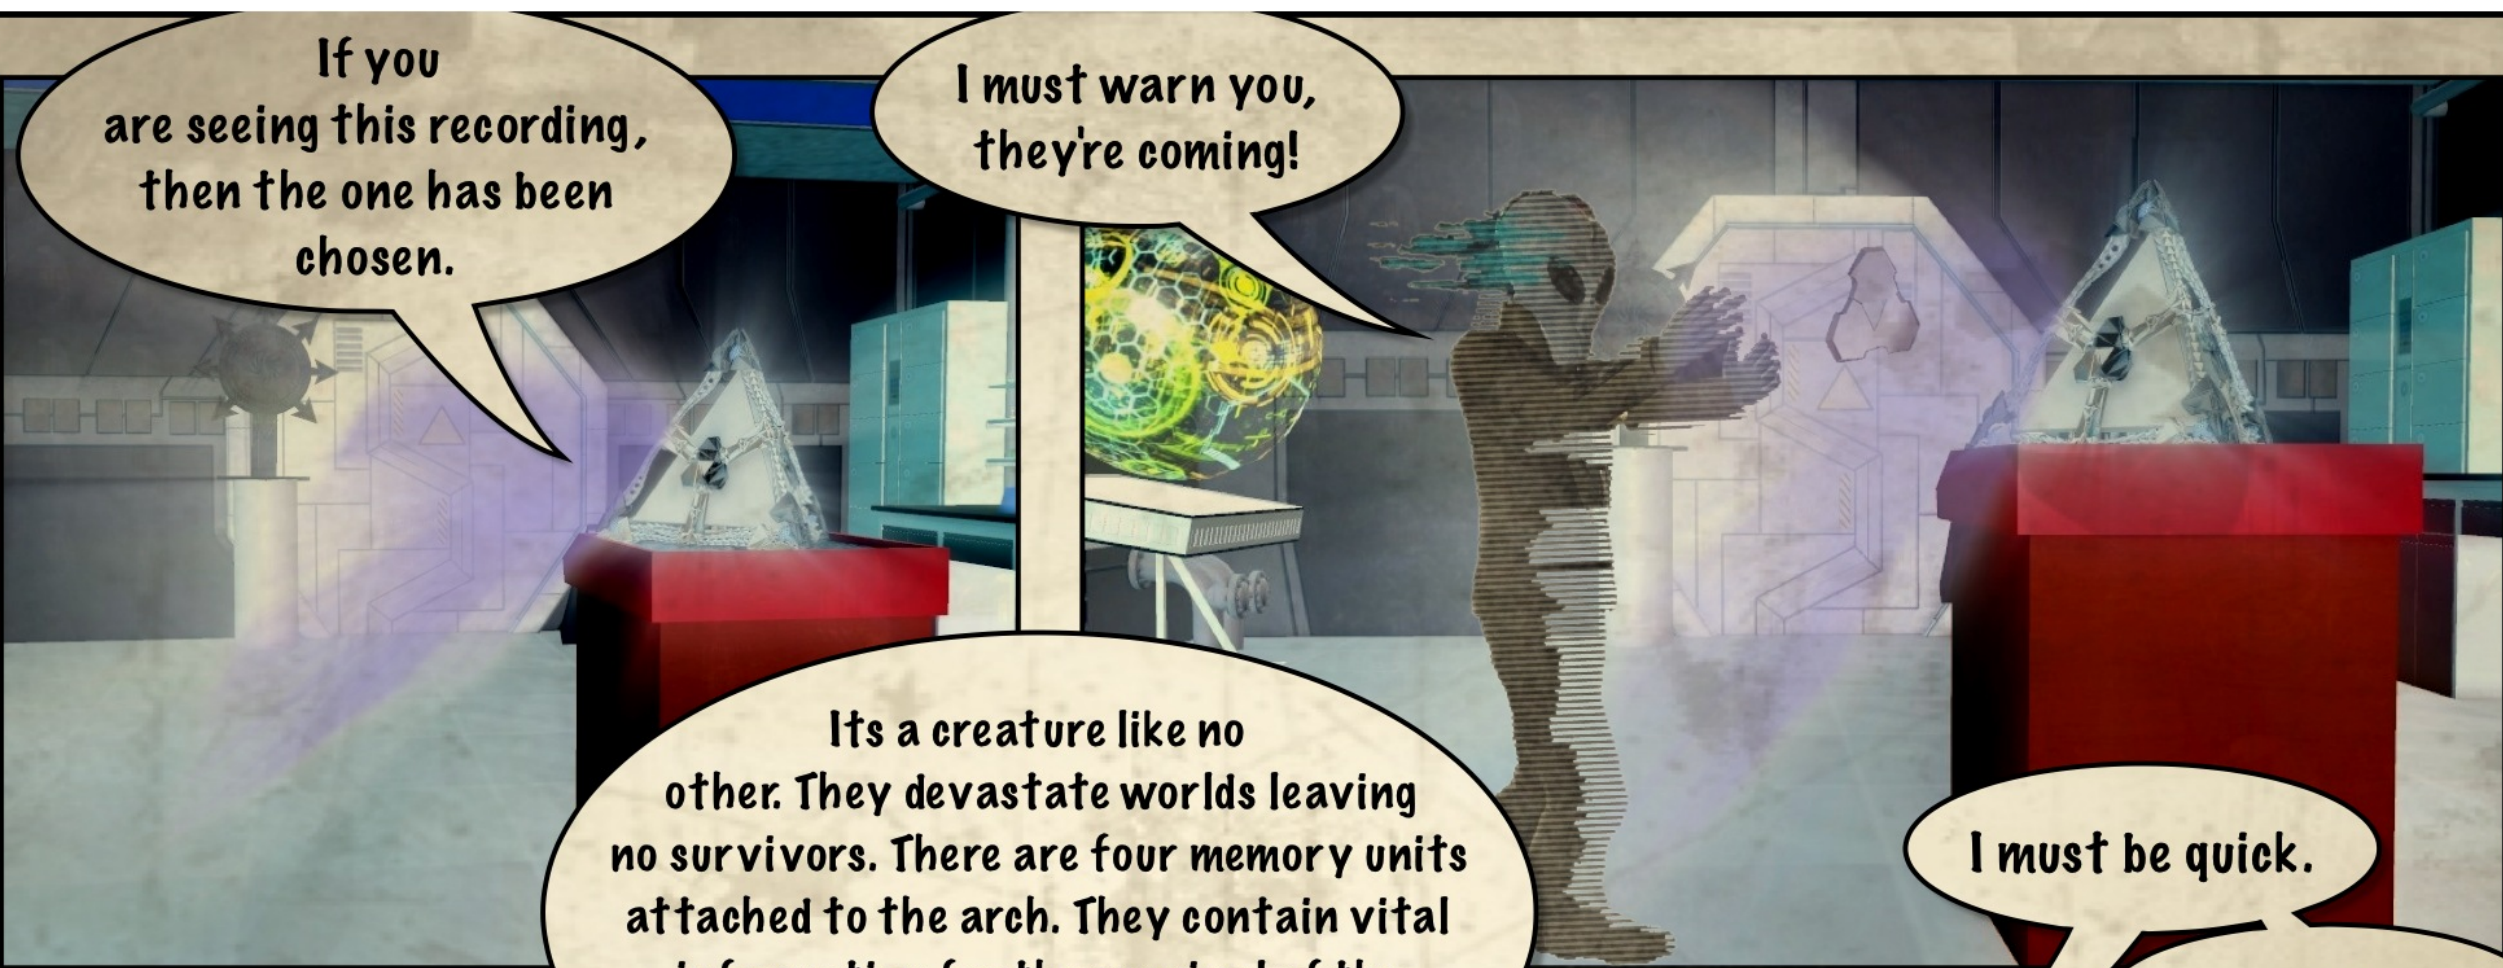

At least we all didn't get knocked unconscious by it this time.

I wonder what it is about you that set it off this time.

Hmm, all well, time to get back to work then.

How about we show Raine where the ships take off from, and then we'll go back to work?

If you are seeing this recording, then the one has been chosen.

I must warn you, they're coming!

Its a creature like no other. They devastate worlds leaving no survivors. There are four memory units attached to the arch. They contain vital information for the survival of the universe. It contains everything we know about the Dogarem.

I must be quick.

Beware of the rain.

That just how it starts.

What ever you do,
no matter how tempting or
beautiful it is.

Don't go in it.
Don't let it touch you.
Don't get it on you.

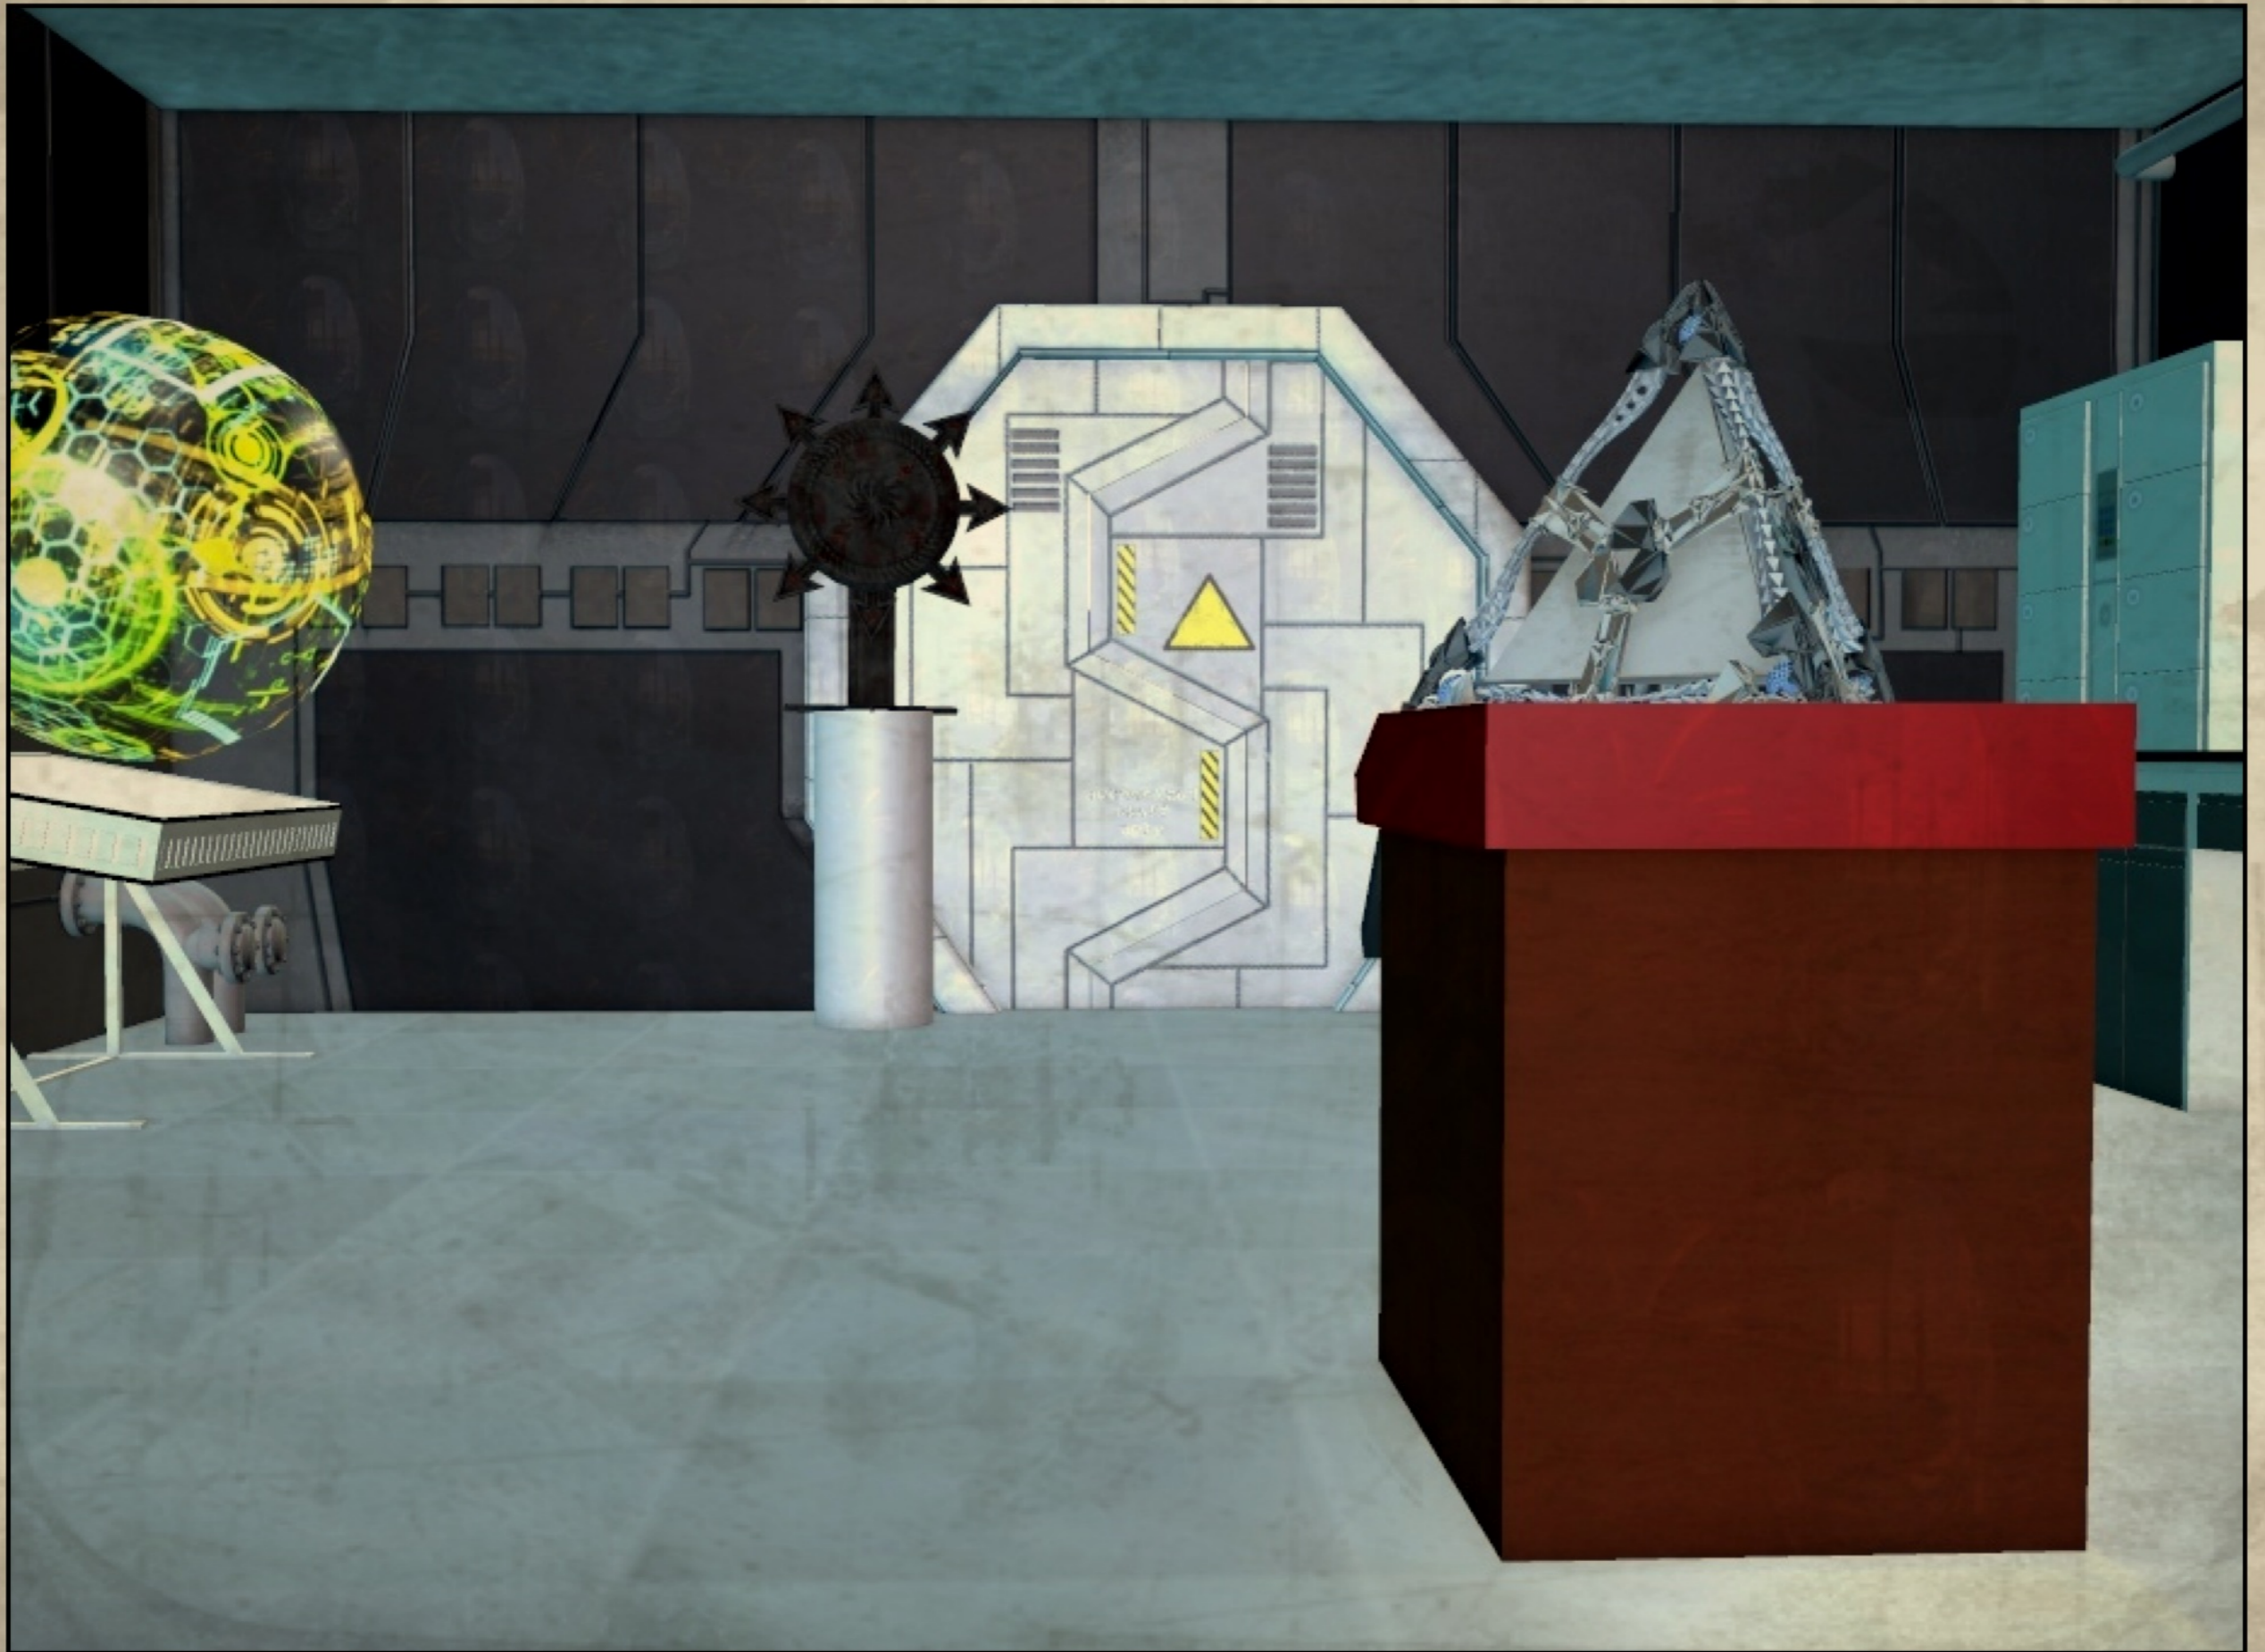

If you want to live,

Don't,

Go in,

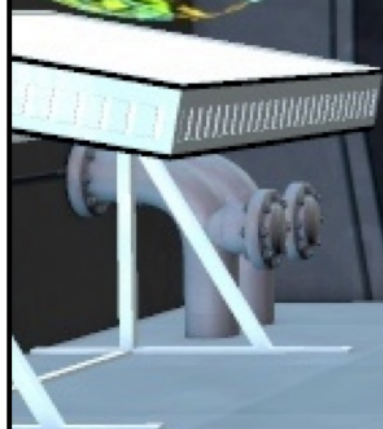

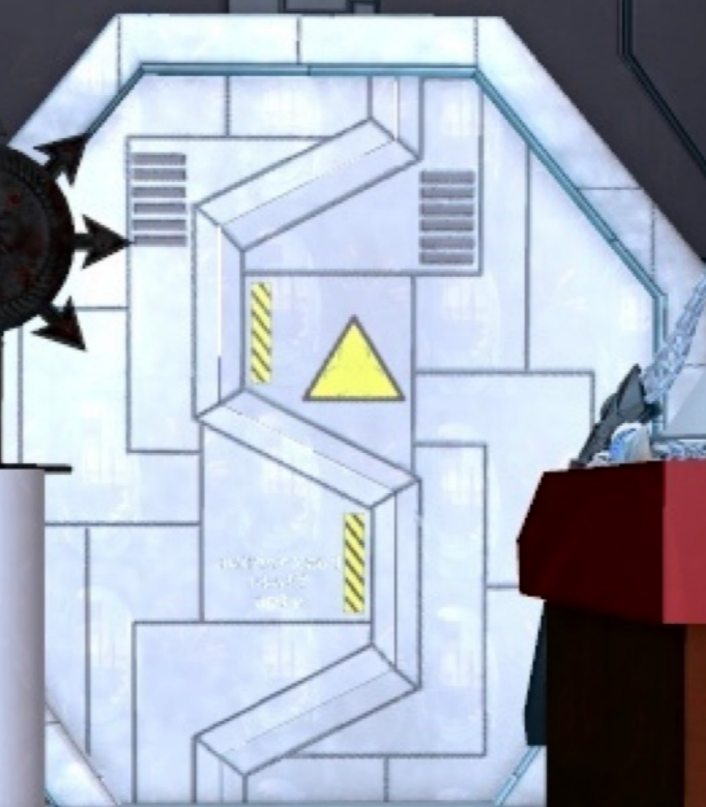

The Rain!

Present day

Earth 3010

KROGAN GUARDS

FOR THE FUTURE OF HUMANITY
YOU CAN TRUST

TO PROTECT AND SERVE

VOTE,
KROGAN
ELECTION
3010

The law throughout our solar system is upheld by the Krogan Guards. It has been dubbed by many as the perfect law enforcer.

Programmed with your safety in mind.

Over seen by the galactic government under the watchful eye of General Krogan.

At the next world election, remember to VOTE 1 for General Krogan. Because, your safety is number one.

ASTROCORP

A GENERAL KROGAN PROJECT

Hey Donny!
I wonder what General Krogan
wants with this thing. It doesn't
seem to do anything!

I don't know, I just
do what I'm told. If they
want me to prepare the
artifact for transport, then
that's what I'll do.

Did you hear
something?

What
the hell!

Wait!

No!

There are to be no witnesses.

Area
secure Sir.

We must
take the artifact
directly to Mars.

As soon
as we reach the launch
bay, notify the clean up crew,
and tell them that they are
needed at Astrocorp,
Sub level 4 .

Meanwhile...

Hey Raine, Tonight's the night of the comet. Are you looking forward to it?

Yes, Raine wants to see the comet.

A celestial body with a nucleus of ice and dust. When close enough to the Sun, displays a visible coma and sometimes a tail. Comets have been traditionally considered bad omens.

What are you doing?

Raine is now ready see the comet.

Raine will wait at the door.

OK Raine, I'll just grab my keys.

That ship
looks like Astrocorp's
Reacon one.

I'm sure
there's no scheduled
launch at this hour.

Maybe they
want to get a better
look at the comet!

Well Raine,
let's go get a better look
for ourselves.

Here we go!
I know a little place just
out of town where we can
get a better view.

Buckle up,
next stop,
the observatory.

The observatory.

As the night went on, spectacular views of the comet were observed by the people of Earth.

Do all comets
look like this?

No, there's
something wrong with all this.
It's too close to the Earth.

Meanwhile...

Hey buster!
Are you getting hungry?
Donny should be home by now.

I wonder
what's taking him so long?
Astrocorp closed hours ago.

This is clean
up crew Delta.

I have
located the
subjects wife. A memory
adjustment has been
authorised.

woof!

I hope
his alright!

A futuristic office scene. In the foreground, a woman in a white shirt is sitting at a desk with a laptop. A large dog is standing on its hind legs next to her. In the background, a robot in a black suit is standing near a door. A speech bubble from the robot says "Grrrrrr".

All knowledge of her husband and life on Earth will be erased.

Her new identity has been uploaded to my data banks. She will become Sally Smith, age 29, born on Mars, no family. She leaves for her new home tonight.

What is it buster?

Is someone at the door?

Is Donny finally home?

Earth, bureau of meteorology

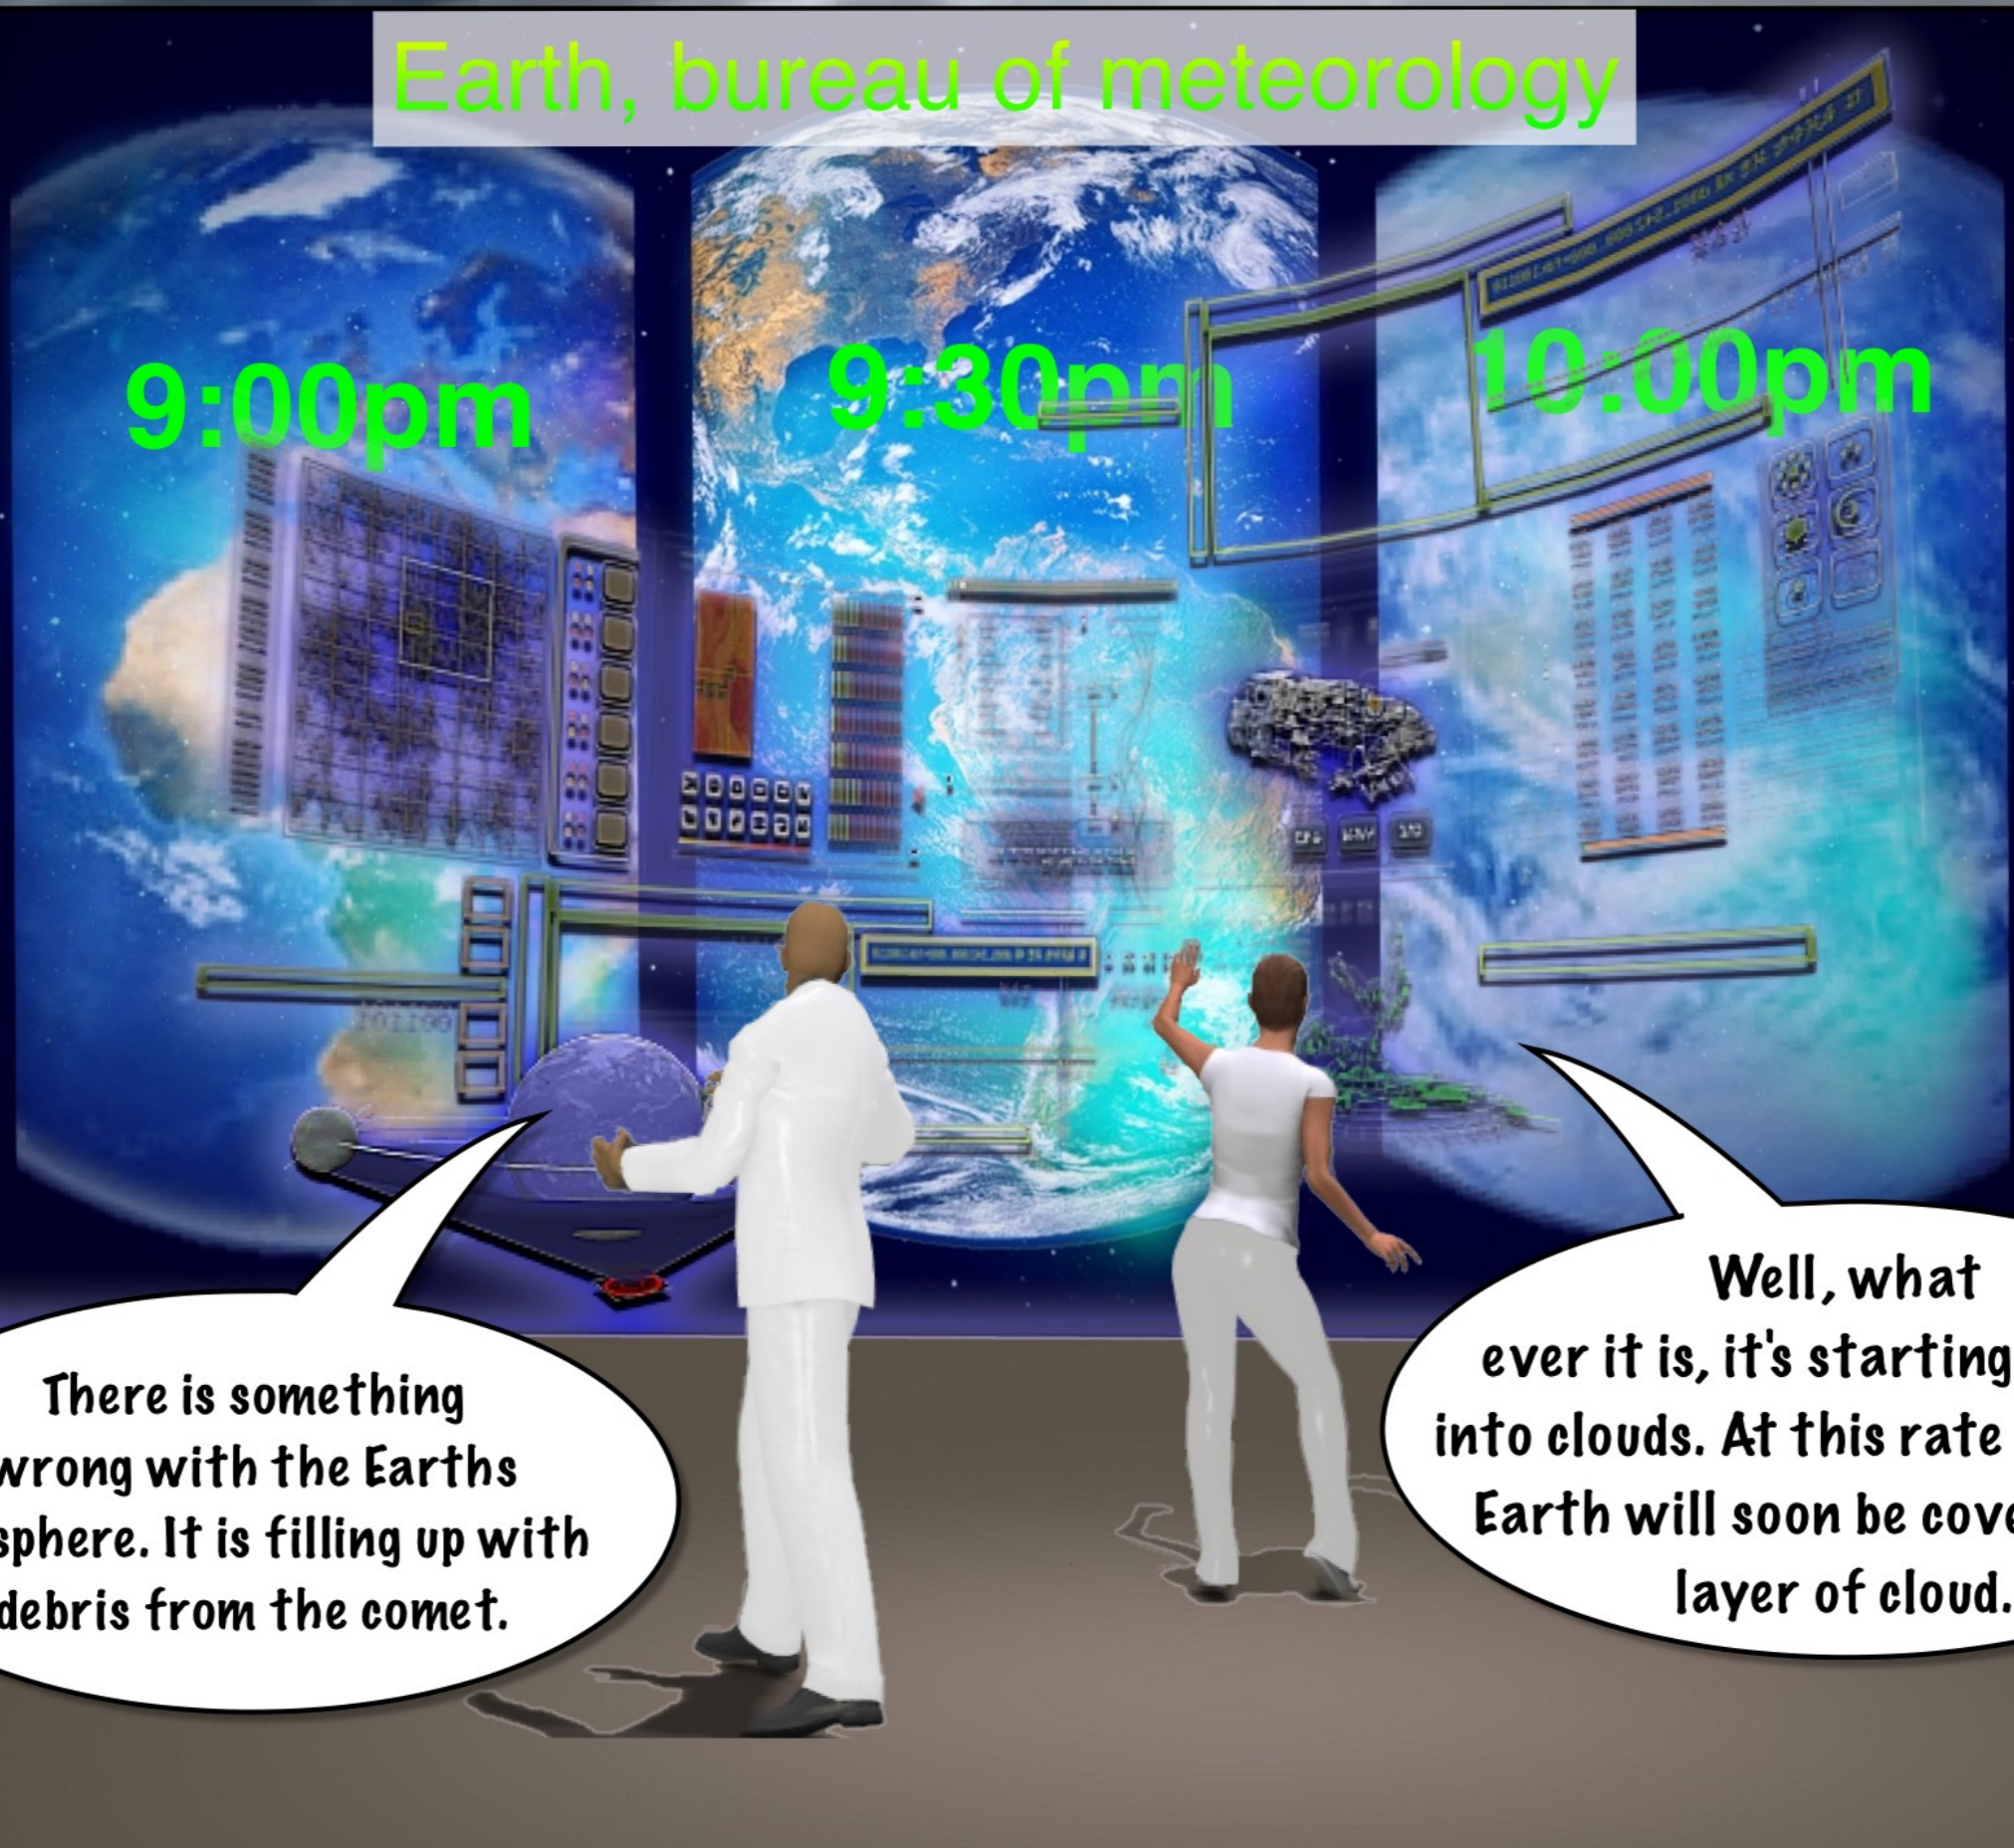

9:00pm

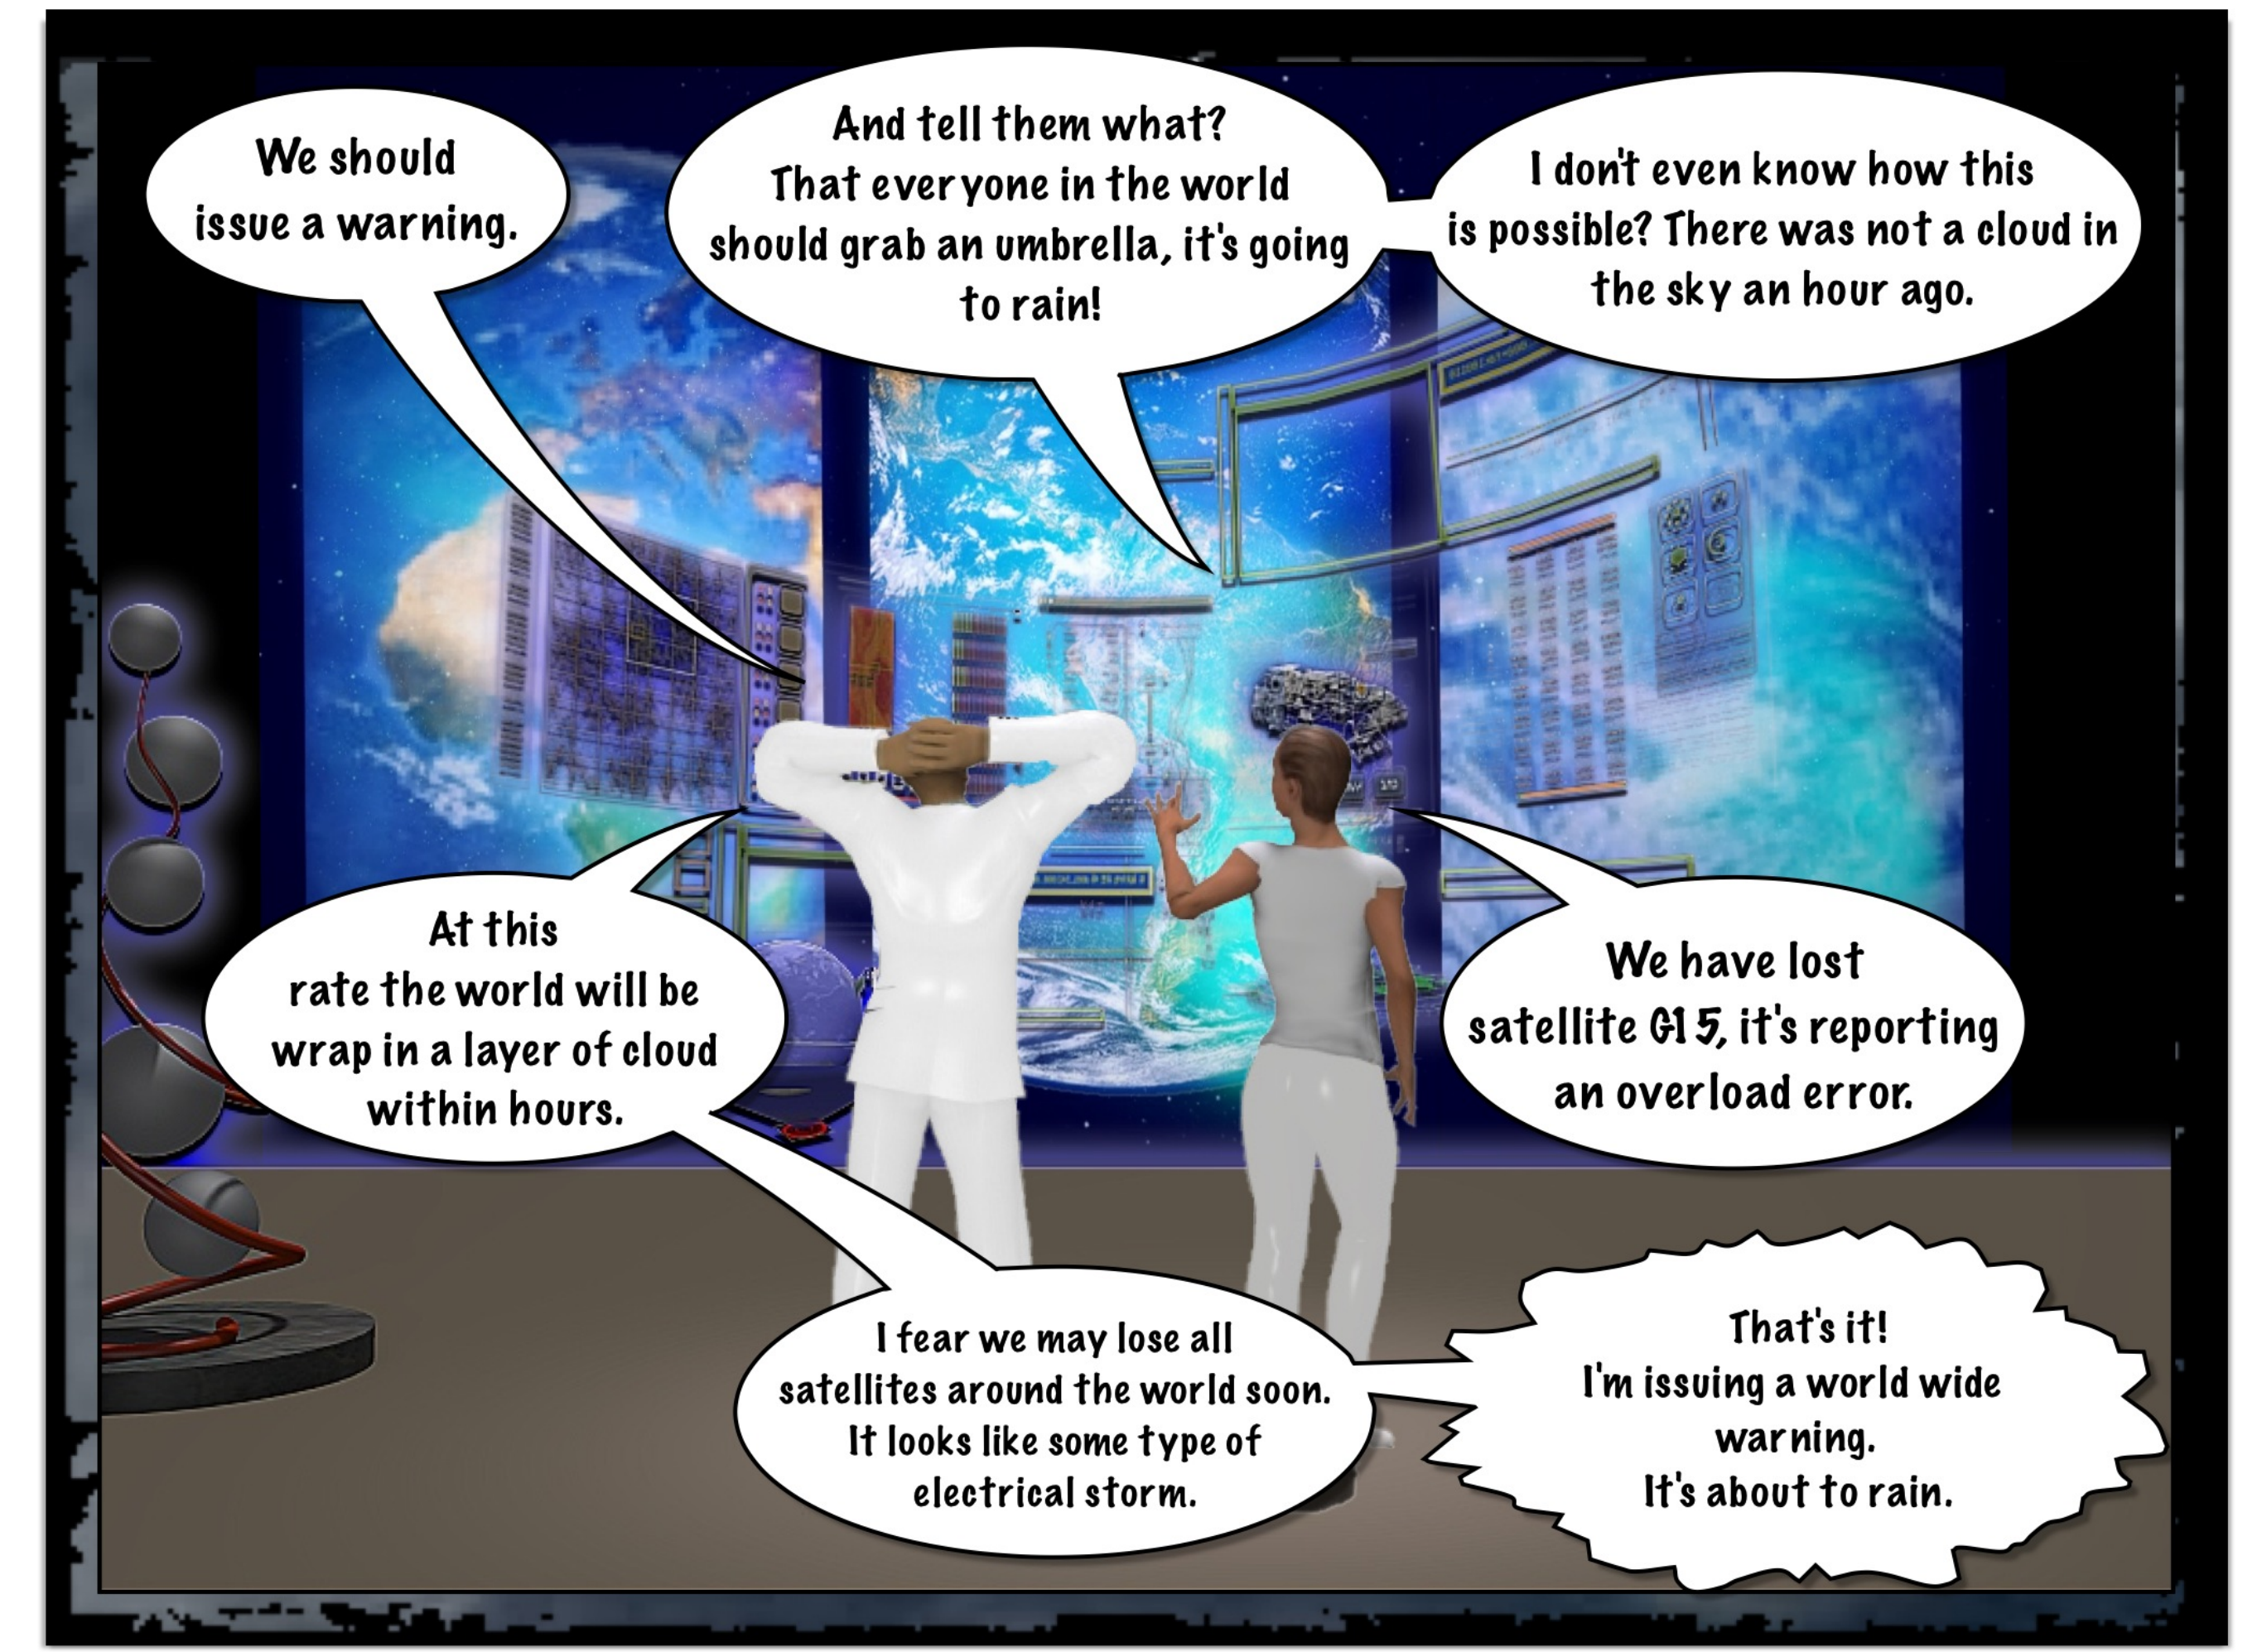

9:30pm

10:00pm

There is something wrong with the Earth's exosphere. It is filling up with debris from the comet.

Well, whatever it is, it's starting to form into clouds. At this rate the entire Earth will soon be covered by a layer of cloud.

We should issue a warning.

**And tell them what?
That everyone in the world should grab an umbrella, it's going to rain!**

I don't even know how this is possible? There was not a cloud in the sky an hour ago.

At this rate the world will be wrap in a layer of cloud within hours.

We have lost satellite G15, it's reporting an overload error.

I fear we may lose all satellites around the world soon. It looks like some type of electrical storm.

**That's it!
I'm issuing a world wide warning.
It's about to rain.**
